

## **SUMMERLAND RODEO GROUNDS UPDATE**

**SEPTEMBER 10, 2009**

### **Completed Work**

We now have 25 available pens for use at shows, clinics and emergencies. Installed is a separate area for you to lunge your horse safely on line. The “safety” fence, as we refer to it, separates the stabling area from the warm-up area.

### **Still to Do**

We need to replace the heavy wood gate, which is our in-gate, with a metal gate so it is easier for horses to pass through. If you can help one evening, call Leo 250-809-6967 and volunteer your help. One person cannot do this by themselves as the gate is so heavy. It would be great if we can get this done before the September show.

### **September 26, 2009 – Saturday’s English Show**

When the jumps are out of the equipment shed (after lunch) plans are in the works to install racks for the jump rails. And, if time permits, to install shelving for the show boxes. If anyone can lend a hand on Saturday, call Leo 250-809-6967.
